## We need your help to replace the missing crank axle

When 35011 was withdrawn from service she sacrificed her crank axle to keep one of her sisters locos in service and a spare trailing wheelset was fitted to enable her to be fit for movement to Woodhams scrapyard at Barry. Since then she has been regarded by some as lost cause due to the missing crank wheelset. But it would have had to been replaced with the original design of crank axle to achieve our objective to restore 35011 back to the air smoothed chain driven valve gear beast that she was before she was modified. We are with your help going to convert the trailing wheelset that we have to hand into a crank axle wheelset at about a cost £30,000 in total this will be broken into phases the first being the recovery of the wheel pans by removal of the axle and crank pins. Second the manufacture of the crank and crank pins which is our targets for 2017

You can help by buying shares in blocks of £250 one Pound shares outright or 10 x £25 Payments by Standing Order

You can also help by making a regular donation to GSN Society which will soon have charitable status who will purchase shares on behalf of their members in the company
